NOTE: Press the same key combination multiple times to switch between the different modes, based on the order position. You can also change the lighting options for that mode if there is a corresponding (check mark) in the table above next to the mode name.

CONTROL LIGHTING EFFECTS

Fn+ →	Change color mode, choose from 9 different modes: 8 single color choices, and one "Rainbow" effect
Fn+ ↑	Increase the brightness, 5 levels to choose from: Off-25%-50%-75%-100%
Fn+ ↓	Decrease the brightness, keep pressing to turn off
Fn+ ←	Change the direction the light is moving
Fn+ = +	Increase the speed of the lighting effects, 4 speed levels: Slow, Moderate, Fast, Ultra
Fn+ −	Decrease the lighting effect speed, keep pressing to turn off

NOTE: When you reach the highest or lowest setting for speed and/or brightness the CAPS/NUM/SCROLL light will flash three times to let you know.

How to customize your OWN lightening MODE?

Step 1: Press **Fn** + to enter into RGB lightening custom mode.

Step 2: Press **Fn** + AGAIN to start setup. Caps/Num/Scroll LED lights will keep flashing on the topright.

Step 3: Press **Fn** + → repeatedly to choose from one of eight colors for key. This will be the color you are going to apply for other keycaps.

Step 4: Press Keys (e.g. W,A,S,D) that you would like to light up with same lightening effects as .

Step 5: Repeat STEP 3&4 until you arrive at your desired RGB lightening effects for different keycaps.

Step 6: Press **Fn** + to save the settings and exit the RGB lightening custom mode.

FACTORY DATA RESET

FN + "PrtSc": Factory reset this keyboard

FN + 🐧 : Disable/Enable the APP key
